## PROFILE

Backend Engineer with 2+ years of experience building and operating production SaaS applications. Experienced in TypeScript/Node.js, PostgreSQL, Redis, Docker, AWS, asynchronous processing, payment integrations, and production infrastructure. Currently responsible for backend architecture and operations across multiple live projects, including multi-server deployments, load balancing, authentication, reliability, and security remediation.

## PROFESSIONAL EXPERIENCE

**Cynical Technology** 🔗, Backend Engineer May 2025 – present | Kathmandu, Nepal

- Owned backend architecture and production operations for Vigile.ai 🔗 as the primary backend engineer, covering API development, authentication, background processing, deployments, and system reliability.
- Designed and maintained a multi-server production architecture with load balancing, dedicated application servers, PostgreSQL and Redis infrastructure, supporting horizontally scalable backend services.
- Managed deployments and ongoing maintenance across 3 production projects and the company website, handling server configuration, application releases, troubleshooting, and operational changes.
- Integrated Stripe-based subscription and payment system for real-world transactions
- Resolved 23+ production issues/hotfixes across authentication, APIs, and background processing workflows, maintaining system stability in live environments.
- Collaborated with VAPT engineers to identify and remediate application security vulnerabilities.

**Invisible Technology** 🔗, AI Trainer (Fullstack Developers) - Contract Mar 2025 – Dec 2025 | Remote

- Reviewed full-stack implementations, wrote Python unit tests, and provided technical feedback on code quality and correctness.

**Geek Tech Solutions** 🔗, Backend Developer Dec 2024 – Apr 2025 | Lalitpur, Nepal

- Built scalable Cafe POS backend; improved performance by 40% using Redis caching and Docker.

**Yuwasoft** 🔗, Fullstack Developer (Freelance) Jun 2024 – Dec 2024 | Remote

- Developed MERN/Django backend services and optimized database queries, reducing application response times by ~20%.

## SKILLS

**Languages:** TypeScript, JavaScript, Python, SQL, Bash

**Frameworks:** Node.js, NestJS, Django, FastAPI, Fastify

**Infrastructure:** AWS EC2, AWS RDS, Docker, Nginx, PM2, Linux, load balancing

**DevOps:** CI/CD, GitHub Actions, Git, deployment automation, production troubleshooting

**Messaging/ Async:** BullMQ, RabbitMQ, background workers, job queues

**Database:** PostgreSQL, MySQL, MongoDB, Redis

**Integrations:** Stripe, webhooks, GitLab, Microsoft Graph

## PROJECTS

**ShareSansarDataScrape** 🔗, Python, Scrapy, GitHub Actions Mar 2024 – Sep 2024

- Built a Scrapy-based market-data collection pipeline with automated daily updates using GitHub Actions.

**News Byte**, Next.js, NestJS, Python, PostgreSQL, Prisma, Docker, Jest Feb 2025 – Sep 2025

Built a full-stack news aggregation platform with automated scraping, TF-IDF/TextRank summarization, PostgreSQL persistence, scheduled jobs, and Jest API tests.

## EDUCATION

**Bachelors in Computer Application**, Samriddhi College 2022 – 2026

## AWARDS

**1st Runner-Up Intra College Hackathon**, Samriddhi College 03 Sep 2024

## LANGUAGES

**English** — Fluent

**Nepali** — Native/Bilingual

**Hindi** — Proficient
